

Petuum Symphony

Standardized AI Building Blocks

- Rich gallery of customizable building blocks for data processing, machine learning and deployment
- Handle all types of data, including images, videos, audio, text, real-time data, graph data, and database

Distributed Operating System

- Support deployment on any hardware from laptops, datacenters, cloud, and IoT to edge computing
- Petuum technology turns multiple computers into a single AI Supercomputer with incredible speed and data scale

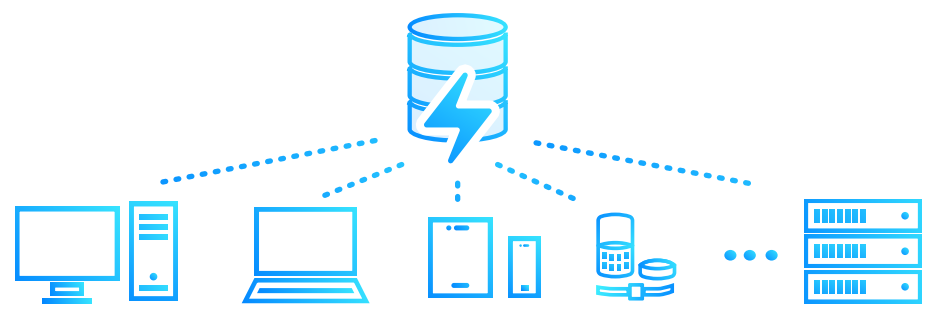

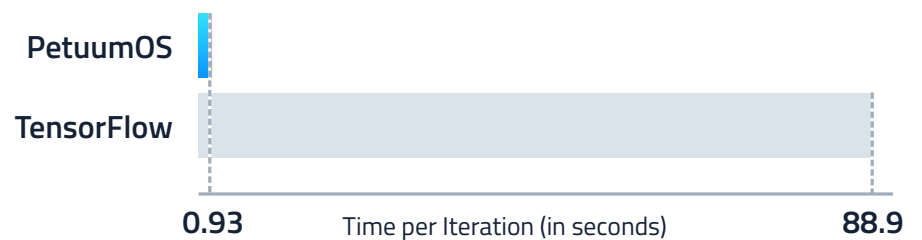

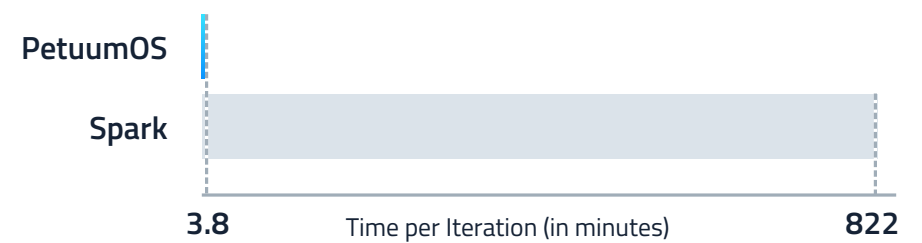

Image Recognition with Deep Learning

Movie Recommendation

Enterprise Ready

- AI functions for many industry sectors: finance, manufacturing, healthcare, transportation, telecommunication, and more
- User management, project management, and access control to enable secure enterprise collaboration

Informed AI Users

- Training courses to teach new users to become AI builders and owners
- Library of reference designs provide high-quality starting points for many AI tasks
